## 96 x 0.2ml Plate

### Non-skirted Thin-wall

Easily cutable into 16, 24, 32 or 48-well pieces. Can be used in many 0.2 ml block regular and Real-Time thermal cycler. Closure can be accomplished with either EU cap-strips, plates or seals.

### O-Type material

This product is made from a blend of PP; optimized for PCR and qPCR applications

ArtCode	Description
<a href="#">B70501</a>	Natural, Box of 25 plates
<a href="#">B70502</a>	Red, Box of 25 plates
<a href="#">B70503</a>	Blue, Box of 25 plates

<a href="#">B70512</a>	SW colors, Box of 25 plates
<a href="#">BA70501</a>	Natural, A-type, Box of 25 plates

## 96 x 0.2ml Plate

### Frosted Non-skirted Thin-wall (Low-profile)

The plate has frosted tubes and can so be used in Real-Time applications without using other colored plates typically used for signal enhancement in Real-Time PCR procedures. Plates can easily be cut into 16, 24, 32 or 48-well pieces.

### Cutable

This product can be cut in a desired size

## 96 x 0.2ml Plate

### Frosted Subskirted Thin-wall

These EU 96-well plates are the quality and price alternative meant for use in any Applied Biosystems regular or Real-Time PCR thermal cycler. They have a very rigid, extra stabilized frame and an elevated skirt.

### Evaporation grade 1

Loss of PCR volume is less than 5%. It is possible to PCR in as less as 5 µl

## EU 0.2ml Thin-wall 8-tube strip

### Classic Regular

Can be used in most 0.2 ml block regular and Real-Time thermal cyclers. Closure can be established with EU optical flat cap thin-wall 8-cap strips (B79701, B75701) or with the EU optical semi-domed 8-cap strips (C79701).
